

Ball Valves

Our ball valves range consists of Brass, Stainless Steel, Steel and Cast Iron ball valves which are available in a range of sizes and working pressure ranges.

Gate Valves

The range consists of Brass and Stainless Steel gate valves which are available in a range of sizes and working pressure ranges.

Globe Valves

Globe valves are available in Bronze, in a range of different sizes and working pressure ranges.

Solenoid Valves and Coils

Our range of ODE solenoid valves and coils consists of; servo-assisted, coupled diaphragm, direct acting and two way solenoid valves.

Hygienic Valves

The Butterfly valves are made of 316 Stainless Steel with all wetted parts finished to <32RA.

Steam Valves and Traps

TLV steam traps are automatic valves used for the discharge of condensate without discharging steam.

Non Return Valves

The following Brass non return valves are available; C831 swing check valve and E831 spring check valves.

Control Valves

The bi-directional valves and uni-directional valves are available in Brass or Steel in a range of sizes.

Float Valves

The float valve comes in two parts – the Brass float valve and the ball float which are available in a range of sizes.

Sluice Valves

The Brass sluice valves have a sliding gate allowing for fast opening and closing. They can be actuated with pneumatic or hydraulic cylinders.
