

## **Camlock Couplings**

'Camlock' couplings are simple, reliable and versatile, which is probably why 'Camlock' couplings are the most widely used industrial quick couplings available today.

Our 'Camlock' couplings are interchangeable with others manufactured to MIL-C-27487F. We can offer 'Camlock' in all sizes, from 1/2" to 12" and all materials. We can also offer 'Camlock' couplings with a wide range of safety and special features, such as locking arms. We can offer any 'Camlock' adapter which may be required and we offer a full range of 'Camlock' seals and spares.

Please see the 'Camlock' Seals page for a guide to seal material selection.
