

Couplings

Cam & Groove Couplings

Hose Tails and Spigots

We stock a large range of Hose Tails and Spigots in different materials including; Brass, Stainless Steel, Steel, Polypropylene, Nylon and Aluminium.

Cam & Groove couplings are general purpose quick connect suction and delivery couplings. Suitable for oil, water, fuel, chemicals and food products. They are available in; PP, Stainless Steel, Brass and Aluminium.

Bauer Couplings

Bauer couplings are general purpose galvanised steel suction and delivery couplings for use with water, sludge and other waste products. Stainless Steel Bauer couplings are also available.

Claw Couplings

Claw couplings are quick release couplings with standard claw sizes allowing interchangeability between all sizes. Claw couplings are available in brass and malleable iron.

Smooth Tail

Smooth tail couplings are suction and delivery couplings which are used with the corresponding safety clamps. The smooth tail fittings are available as threaded couplings and cam couplings.

Fire Couplings and Fittings

Kiowa stock the following fire couplings and fittings; instantaneous couplings, standpipes, branchpipes and nozzles.

Foot Valves and Strainers

Our range of galvanised steel foot valves are available in 2" to 8" complete a non return valve, and tin can strainers are available in 1" to 8".

IBC Couplings and Adaptors

IBC Couplings and Adaptors are all moulded from glass reinforced PP. They cover a wide range of IBC threads adapting them to be BSP standard couplings.
