

# Fittings & Gauges

---

### Fittings

The Wade compression couplings are suitable for use within the hydraulic, pneumatic, automotive and power generation industries. The Super Speed fittings are plastic fittings for use in the connection of nylon, polyurethane and soft metal tubes.

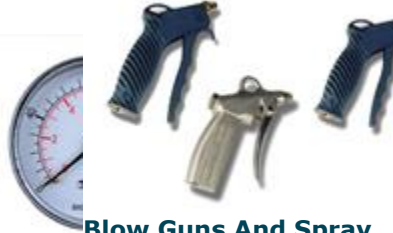

### Legris Function Fittings

Legris function fittings are compact, precise and reliable. The wide range of shapes, types of adjustment and their size ensure a perfect fit for your needs.

### Gauges

Dry and liquid filled gauges are available in either 40mm or 63mm. The gauges are available as back mounted or lower mounted.

### Blow Guns And Spray Guns

The blow guns are available in plastic or Aluminium and come with one of a range of nozzles. The gravity spray gun is suitable for use with water based paints.

### Motor Accessories

The PCL motor accessories range includes; pocket gauges, service gauges, tyre gauges, tread depth gauges, valve tools and a tyre safety pack.
