

## HYGIENE FITTINGS

BMI Hose Ltd, offers hygienic hose assemblies and a full range of stainless steel hygienic fittings and valves for use in the food, dairy, beverage and brewery industries. Fittings are available in a variety of fitting types (RJT, SMS, DIN, IDF & Triclamp) with sizes from 1/2" - 12" meeting 3A standards.

The BMI range of suction and delivery hoses are much lighter and more flexible than conventional food & brewers hose and are especially suitable for use with product where completely odourless and taste-free rubber is required. San Hygienic hose is lighter and more flexible than conventional hose offering premium performance

Accredited by Lloyds Register and in accordance the Pressure Equipment Directive 97/23/EC, all our hose assemblies are tested and certified on-site prior to dispatch

Below is selection of our range of standard products, we are able to offer much more as well...
