

Valves & Pipe Fittings

Valves

Our extensive range of valves consists of ball and gate valves, globe valves, solenoid valves & coils, hygienic valves, steam valves & traps. Also non return and control valves, float and sluice valves. All available in a wide range of materials and sizes.

Packing & Jointing

The pump and valve packing range consists of Fortuna XA, Fluolion Filament Type L and Sextant. These high performance packings can be used where exceptional chemical resistance is required in valves, rotating equipment and reciprocating plant or high speed rotary pumps on boiler feed systems in the power generation, marine and petrochemical industries

The jointing materials range includes both Centurion and Inca which are used worldwide on all types of industrial plant and equipment.

Pipe & Pipe Fittings

Pipe and Fittings including standard PVC pipe and standard pipe fittings available in malleable Iron, wrought Iron, Stainless Steel, PVC, ABS and Polypropylene.

Hygienic polished or de-scaled hygienic pipe and fittings including nuts, liners, seals and pipe clips.

Transair Pipe & Fittings

The Transair pipe and fittings range is used for compressed air, inert gases and vacuum applications. The pipe and fittings are quick and simple to install, they are also interchangeable allowing easy modification for all customers.

The transair tool kit and Transairs push-to-connect fittings eliminates the need for special tools, pipe preparation and threading.
